

## Enclose Contributions to LEED

# Enclose

Minimize impact. Maximize investment. Enclose™ is durable and adaptable so it will keep working for you through many years of change. Enclose helps achieve LEED credits. Enclose products may contribute to the individual prerequisites and credits of LEED. Because LEED is a holistic building rating system and sustainable design guideline, there is no such thing as LEED-certified products—only ways of using and applying products to support the criteria.

Enclose contributes to the following LEED Certifications:

[LEED CI - Commercial Interiors](#)

[LEED NC - New Construction](#)

[LEED EB - Existing Buildings](#)

[LEED CS - Core and Shell Development](#)
