About us

With expert advice our team can help you implement green solutions that protect the environment, improve indoor air quality, and contribute to LEED or WELL Building Standard™ certification. We can reclaim furniture and plan more energy efficient spaces, all while saving money in both the short and long term.

Locally owned and operated for over 25+ years, our re-manufacturing division has become the largest office furniture re-manufacturer in Eastern Ontario and Western Québec. We can re-size, refinish, and reupholster to create unique furniture that meets your needs. We also pride ourselves on restoring loved, quality pieces to extend the life of the furniture you simply can not work without. Our commitment to refurbishing office furniture results in a lower impact on the environment and the bottom line. Our guiding principal is that office furniture should not come at the cost of our environment.

ABI provides unparalleled service including:

- » Competitive pricing
- » Comprehensive warranties
- » Driven lead times
- » Professional manufacturing team
- » LEED points
- » Our guiding principle is that Office Furniture should not come at a cost to our environment.
- » The Re-manufacturing division diverts nearly 1,000 work stations from the landfill annually.
- » Produced in our local facility thus reducing the carbon footprint.

Uniboard Green Stats

Meets or exceeds CARB Phase 2 emissions standards | FSC® certified | ECC™ certified |
Made from 100% recycled and recovered wood fiber (pre-consumer) | Up to 6 LEED points
